

TABEL PEMBEDAHAN

Tabel Pembedahan ini adalah sebagai dasar pembayaran atau klaim Biaya Pembedahan, Biaya Kamar Operasi dan Biaya Pembiusan. Tindakan Pembedahan ini dikelompokkan menjadi "COMPLEX", "MAJOR", "INTERMEDIATE" dan "MINOR". Jika terjadi tindakan pembedahan yang tidak tercantum pada Daftar Pembedahan, Perusahaan akan menentukan kelompok pembedahan tersebut berdasarkan tindakan yang memiliki tingkat keparahan sebanding.

1. ABDOMEN AND DIGESTIVE SYSTEM	Surgical Category
Abdomen, exploratory laparotomy, celiotomy	Major
exploration, retroperitoneal	intermediate
Peritoneum, Abscess, drainage	intermediate
Anus, Abscess, incision and drainage	Minor
Fistulectomy, Subcutaneous	Minor
Submuscular	intermediate
Fissurectomy, with/without sphincterotomy	intermediate
Hemorrhoidectomy, external, complete	intermediate
Internal and external, simple	intermediate
By Laser, Stapler	intermediate
Appendix, Abscess, incision and drainage	Major
Appendectomy	intermediate
Biliary tract, excision of	Major
choledochotomy / choledochostomy with / without cholecystotomy	Major
Cholecystectomy	Major
With open exploration of common duct	Major
Cholecystotomy or cholecystostomy	intermediate
Endoscopy : Anoscopy, with collection specimen	Minor
Colonoscopy, beyond splenic flexure	intermediate
with removal polyp	intermediate
Esophagoscopy with collection specimen	intermediate
with biopsy, one or more	intermediate
Esophagogastrosocopy, with collection specimen	intermediate
with biopsy, one or more	intermediate
Gastrosocopy, with collection specimen	intermediate
with biopsy, one or more	intermediate
Endoscopic Retrograde Cholangio Pancreatography (ERCP)	intermediate
with insertion of tube / stent	Major
Esophagus, Esophagotomy, cervical approach, with/without removal foreign body	intermediate
Esophagectomy, resection with gastric anastomosis	Major
Diverticulectomy, esophagus or hypopharynx cervical approach	intermediate
Esophagoplasty with repair of tracheo-esophageal fistula	Major
Intestines, Duodenotomy	intermediate
Enterolysis, with acute bowel obstruction	intermediate
Enterotomy, with exploration/ removal foreign body, small bowel	intermediate
Excision, one or more lesions small/large bowel, single enterotomy	intermediate
Enterectomy, resection small intestines	Major
Colectomy, partial, with anastomosis	Major
with colostomy	Major
Tube enterostomy or cecostomy	Major
Ileostomy	Major
Repair of inguinal/ femoral/ scrotal/ umbilical/ diaphragmatic hernia	intermediate
Incarcerata / strangulated hernia	Major
Liver, needle biopsy, percutaneous	Minor
wedge biopsy	intermediate
Hepatectomy, partial lobectomy	Major
Cyst or abscess, marsupialization of	intermediate
Hepatorrhaphy-suture wound, simple	intermediate
Mouth and tongue, glossectomy, partial, with unilateral radical dissection	Major
total, with unilateral radical nect dissection	Major

Pancreas, Biopsy pancreas	intermediate
Excision lesion of pancreas	Major
Pancreatectomy, with pancreatico-jejunostomy	Major
Whipple type	Major
Marsupialization, cyst of pancreas	intermediate
Rectum, incision and drainage, deep supra levator/perirectal/retrorectal abscess	Minor
Biopsy, incision, ano-rectal wall, anal approach	Minor
Dilation of rectal/ anorectal stricture	Minor
Proctectomy, complete, combined abdominoperineal	Major
Proctoplasty, for prolapse mucous membrane	intermediate
Proctopexy for prolapse, with sigmoid resection	Major
Closure, reclovesical, rectourethral fistula, with colostomy	Major
Stomach, Gastrotomy, with exploration of foreign body removal	intermediate
Pyloromyotomy	intermediate
Gastric biopsy, by laparotomy	intermediate
Local excision ulcer or tumor	intermediate
Total gastrectomy, with repair by intestinal transplant	Major
Sub-total or hemi gastrectomy, with vagotomy	Major
Vagotomy and pyloroplasty, with or without gastrostomy	Major
Pyloroplasty	intermediate

2. AMPUTATIONS AND DISARTICULATIONS	Surgical Category
Arms, through humerus, with implant	intermediate
Ankle, disarticulation/amputation, through malleoli, tibia and fibula	intermediate
Finger or thumb, amputation at any joint, single, including neurectomies	Minor
Foot, amputation, mid-tarsal or transmetatarsal	intermediate
Forearm, through radius and ulna	intermediate
Hand, transmetacarpal	intermediate
Hip, interpelviabdominal amputation	Complex
disarticulation	Major
Leg through tibia and fibula with immediate fitting technique	intermediate
Shoulder, amputation, inter thoracoscappular	Major
disarticulation	Major
Thigh, amputation through femur, any level	intermediate
disarticulation at knee	intermediate
Toe, Amputation, meta-tarsophalangeal joint	Minor
Wrist, amputation	intermediate
Interpelviabdominal amputation (hind quarter amputation)	Complex

3. BRAIN, NERVOUS SYSTEM	Surgical Category
Skull, burr holes, not followed by other surgery	intermediate
burr hole or trephine for drainage intracranial abscess or cyst	Major
crainectomy or craniotomy, exploratory supratentorial infratentorial	Major
exploration of orbit or decompression	Major
unilateral	Major
Elevation of depressed fracture, simple, extradural	Major
Compound or comminuted	Major
with debridement brain and repair of dura	Major
BRAIN, lobotomy, including cingulotomy	Complex
bilateral	Complex
Brain tumor, excision of supratentorial, except meningioma	Complex
meningioma	Complex
Brain abscess, excision of	Complex
Cyst, excision of fenestration, supratentorial	Complex
Brain tumor, intratentorial or posterior fossa	Complex
meningioma, intratentorial or posterior fossa	Complex
Lobectomy, partial or total	Complex
Hemispherectomy	Complex

Craniectomy for craniostenosis, multiple sutures	Complex
Foraminotomy	Major
Foreign body, excision of from brain	Major
SPINE, spinal puncture, lumbar, diagnostic	Minor
for decompression	Minor
Laminectomy for exploration intraspinal canal.	
one or two segments cervical or thoracic	Major
lumbar	Major
for decompression spinal cord and/or cauda	Major
equina, one or two segments, cervical, thoracic lumbar	Major
Laminotomy, one interspace, for herniated disc	
and/or decompression root nerve, cervical	Major
bilateral	Major
lumbar	Major
Laminectomy, for herniated disc. Thoracic, posterior approach	Major
Discectomy, single interspace, cervical	Major
Laminectomy, for intraspinal lesion, cervical / thoracic	Major
lumbar	Major
Creation of Shunt-ventriculo peritoneal	Complex
Transpedicular approach with decompression of spinal cord, equina and/or nerve roots	Major

4. DISLOCATIONS	Surgical Category
ANKLE, closed, manipulative reduction with anaesthesia	Minor
closed or open, open reduction	intermediate
distal tibio-fibular joint, closed or open, open reduction	intermediate
ELBOW closed, manipulative reduction, with anaesthesia	Minor
closed or open, open reduction	intermediate
FINGERS, Metacarpophalangeal, closed.	
requiring anaesthesia	Minor
open, uncomplicated, manipulative	Minor
closed or open, open reduction	intermediate
intrapalangeal joint, closed manipulative	Minor
open, uncomplicated, manipulative	Minor
closed or open, open reduction	Minor
HIP traumatic dislocation, manipulative with anaesthesia	Minor
closed or open, with acetabular hip fixation	Major
JAW temporo-mandibular, simple, closed reduction	Minor
open reduction with interdental fixation	Major
KNEE closed, manipulative reduction, with anaesthesia	Minor
closed or open, open reduction	intermediate
KNEE CAP closed manipulative reduction with anaesthesia	Minor
closed or open reduction with/without patellectomy	intermediate
SHOULDER sternoclavicular, manipulative reduction	Minor
closed or open, acute or chronic, open reduction/repair	intermediate
with fascial graft, includes obtaining graft	intermediate
acromioclavicular, with fascial graft incl. obtaining graft	intermediate
TOES tarsal bone, closed, manipulative, with anaesthesia	Minor
open, uncomplicated, manipulative	Minor
closed or open, open reduction	intermediate
astragalo-tarsal joint, closed, manipulative.	
without anaesthesia	Minor
with anaesthesia	Minor
open, uncomplicated, manipulative	Minor
closed or open, open reduction	intermediate
tarso-metatarsal, closed manipulative, with anaesthesia	Minor
with percutaneous skeletal fixation	Minor
open uncomplicated, manipulative	Minor
closed or open, open reduction	intermediate

metatarsophalangeal, closed, manipulative with anaesthesia	Minor
open, uncomplicated, manipulative	Minor
closed or open, open reduction	Minor
interphalangeal joint, closed, manipulative with anaesthesia	Minor
open, uncomplicated, manipulative	Minor
closed or open, open reduction	Minor
WRIST, radio-carpal or intercarpal closed manipulative reduction	Minor
closed or open, open reduction	intermediate
distal radio-ulnar, closed, manipulative	Minor
closed or open, open reduction or repair	intermediate

5. EAR, NOSE, THROAT	Surgical Category
EAR: excision aural polyp	Minor
Fenestration , unilateral	Major
Myringotomy by needle, with/without aspiration/eustachian inflammation	Minor
Tympanostomy (requires of ventilating tube) with opening microscope office	Minor
in surgical suite	Minor
Transmastoid antrotomy	intermediate
Mastoidectomy modified radical or radical unilateral	Major
Myringoplasty confined to drummed and donor area	intermediate
Tympanoplasty	intermediate
with mastoidectomy	Major
with ossicular chain reconstruction	Major
Tympanic membrane repair	intermediate
Stapes mobilization	intermediate
Removal foreign body from external auditory canal	Minor
with general anesthesia	intermediate
Removal impacted cerumen, one/both ears	Minor
Clearance of middle ear for granuloma, cholesteatoma & polyp	Major
Middle ear exploration through postauricular/ear canal incision	Minor
Drainage external ear, abscess/hematoma; simple	Minor
NOSE: excision polyp(s), simple	Minor
excision or surgical planning, for rhinophyma	intermediate
excision, dermoid cyst, simple	Minor
turbinate, partial/complete	Minor
submucous resection, turbinate, partial/complete	intermediate
removal foreign body, intranasal, requiring general anaesthesia	Minor
Sinuses; lavage by cannulation (antrum puncture or natural ostium) each	Minor
sphenoid sinus	Minor
sinusotomy maxillary, intranasal, unilateral	intermediate
radical, (Caldwell-Luc) unilateral	Major
combined, three or more sinuses	Major
Control nasal hemorrhage anterior, simple	Minor
Control nasal hemorrhage posterior with posterior nasal pack	intermediate
THROAT	
Larynx: laryngotomy, with removal tumor/laryngocele, cordectomy	Major
Laryngectomy, total without radical neck dissection	Major
with radical neck dissection	Major
Laryngoscopy with removal foreign body, excision of tumor	
and/or stripping of vocal cord/epiglottis	intermediate
Pharyngolaryngectomy with radical neck dissection and/reconstruction	Complex
Pharynx, Adenoids, Tonsils, Drainage, Abscess, Peritonsillar	Minor
retropharyngeal/parapharyngeal, intra oral	Minor
Tonsillectomy, with or without adenoidectomy	intermediate
Uvulectomy	intermediate
Adenoidectomy	intermediate
Marsupialization of sublingual salivary cyst	intermediate
Excision of parotid gland/tumor, total	

with dissection & preservation of facial	Major
with unilateral radical neck dissection	Complex

6. ENDOCRINE SYSTEM	Surgical Category
THYROID : Thyro-glossal cyst, incision and drainage	Minor
biopsy, needle	Minor
cyst or adenoma, small excision of, or transection of isthmus	intermediate
Lobectomy, total, unilateral, with contralateral subtotal lobectomy	intermediate
Thyroidectomy, total or complete	intermediate
total or sub-total with radical neck resection	Major
Endolymphatic sac operation with shunt	Complex
Vestibular nerve section, translabjrinthine	Complex
Total facial nerve decompression and/or repair, may include graft	Complex
Decompression, internal auditory canal	Complex
Tympanic neurectomy	Complex
Radical excision, external auditory canal lesion, with neck dissection	Complex

7. EXCISION, FIXATION OR REPAIR BY CUTTING OPERATIONS	Surgical Category
ANKLE : Achilles Tendon repair ; primary	intermediate
lengthening or shortening of tendon, single	Intermediate
repair, primary, torn or severed collateral ligament	intermediate
both collateral ligaments	intermediate
ELBOW: tendon lengthening, single	intermediate
Flexorplasty	intermediate
Arthroplasty, radial head, with implant	intermediate
FEMUR, excision bone cyst/benign tumor	intermediate
with autogenous graft (includes obtaining graft)	intermediate
HAND and FINGERS, excision/curettage bone cyst/benign tumors, metacarpal ,	
with autogenous graft (includes obtaining graft)	intermediate
phalanx	intermediate
with autogenous graft (includes obtaining graft)	intermediate
HIP: external oblique muscle transfer to greater trochanter, including graft	intermediate
iliopsoas transfer to greater trochanter	Major
muscle release, complete	Major
arthroplasty with acetabuloplasty	Major
actelabular and proximal femoral prosthetic replacement	Major
osteotomy iliac or acetabular	Major
arthrodesis, hip joint, with subtrochanteric osteotomy	Major
HUMERUS, excision/curettage bone cyst/benign tumor	intermediate
KNEE: suture intrapatellar tendon, primary	intermediate
lengthening hamstring tendon, multiple one leg	intermediate
repair, primary , torn/severed collateral ligament with or without menisectomy	intermediate
collateral and cruciate ligaments	Major
capsulotomy, posterior capsular release	intermediate
PELVIS, excision bone cyst/benign tumor, superficial pelvis; with or without graft	Minor
Arthroscopy Diagnostic	Minor
Biopsy, bone, trocar/needle; superficial (eg. Ilium, sternum,ribs)	Minor
Biopsy, bone, excisional; superficial (eg. Ilium, sternum,ribs)	intermediate
Incision, extensor tendon sheath, wrist (eg. de Quervains's disease)	Minor

8. EYE	Surgical Category
EYEBALL : evisceration ocular contents, with implant	intermediate
enucleation, with implant, muscles attched to implant	intermediate
exenteration of orbit, with temporalis muscle transfer	Major
removal foreign body, conjungtival, superficial	Minor
embedded, subconjunctival	Minor
corneal, with slit lamp	Minor
Trabeculoplasty by laser surgery, one/more sessions (defined treatment series)	Major

Severing adhesions of anterior segment of eye Incisional technique, Goniosynechia	Major
EXTRAOCULAR MUSCLE, repair wound	Minor
Blepharoplasty, lower eyelid	intermediate
Repair of blepharoptosis; frontalis muscle technique with suture/ other material	Major
CORNEA : excision of lesion	intermediate
excision or transposition of pterygium	Minor
Destruct. of lesion of cornea by cryotherapy	intermediate
Keratoplasty	Major
SCLERA : fistulization for glaucoma, trephine, with iridectomy	intermediate
repair scleral staphyloma, with graft	Major
IRIS : Iridotomy, stab incision	intermediate
Iridotomy, with cycletomy	Major
Iridotomy/Iridectomy by laser surgery	intermediate
LENS: removal after cataract or membranous cataract	Major
removal lens material, aspiration technique	Major
expression of cataract, linear	Major
repositioning of intraocular lens prosthesis, requiring an incision	Major
RETINA: repair retinal detachment	Major
with vitrectomy, with/without air tamponade	Major
prophylaxis, retinal detachment, diathermy or cryotherapy	Major
destruction, localized lesion, retina or choroid	Major
CONJUNCTIVA : incision and drainage cyst, stye	Minor
Biopsy of conjunctiva	Minor
LACRIMAL SYSTEM : incision and drainage lacrimal gland	Minor
lacrimal sac, dilation	Minor
excision of lacrimal sac or gland-total or partial	intermediate
Closure of the lacrimal punctum	intermediate
CILIARY BODY DESTRUCT : Cyclodialysis	intermediate
Cyclophotocoagulation	intermediate

9. FRACTURES	Surgical Category
ANKLE : single malleolus, closed, manipulative reduction	Minor
closed or open, open reduction with skeletal fixation	intermediate
bi-malleolar, closed, with manipulative reduction	Minor
closed or open reduction with/without skeletal fixation	intermediate
tri-malleolar, closed, manipulative reduction, with anaesthesia	intermediate
closed or open, open reduction, with skeletal fixation posterior lip (malleolus)	intermediate
CLAVICLE closed, manipulative reduction	Minor
closed or open, open reduction, with/without skeletal fixation	intermediate
ELBOW: comminuted, closed, manipulative reduction	intermediate
closed or open, open reduction, with/without skeletal fixation	Major
FEMUR shaft, closed, manipulative reduction, age 12 and over	intermediate
closed or open , reduction with/without skeletal fixation, over 12	Major
distal end, medial or lateral condyle, closed, manipulative reduction	intermediate
closed or open, open reduction with/without skeletal fixation	Major
FIBULA, proximal end, open, uncomplicated soft-tissue closure, manipulative	Minor
closed or open, open reduction, with skeletal fixation posterior lip (malleolus)	intermediate
distal end, closed, manipulative reduction with anaesthesia	Minor
closed or open, open reduction with skeletal fixation	intermediate
FINGERS : metacarpal single, closed, manipulative reduction	Minor
closed/open, open reduction with/without skeletal fixation	intermediate
carpometacarpal , closed, manipulative reduction	Minor
with skeletal fixation	Minor
closed/open, open reduction, with/without skeletal fixation	intermediate
phalangeal, closed, manipulative reduction	Minor
closed/open, open reduction, with/without skeletal fixation	Minor
intra-articular, complex, open reduction, with/without skeletal fixation	intermediate
FOOT : Tarsal, closed, manipulative	Minor

Metatarsal, closed, manipulative	Minor
HUMERUS : shaft, closed manipulative reduction	Minor
closed/open reduction, with/without skeletal fixation	intermediate
supracondylar or transcondylar, closed, manipulative reduction	Minor
with traction, pin or skin	intermediate
with percutaneous skeletal fixation	intermediate
closed/open , open reduction, with/without skeletal fixation	intermediate
epicondylar, medial or lateral, closed, manipulative reduction	Minor
closed/open, open reduction with/without skeletal fixation	intermediate
condylar, radial or lateral, closed, manipulative reduction	Minor
closed/open , open reduction, with/without skeletal fixation	intermediate
JAW: mandibular, closed, manipulative reduction with interdental fixation	intermediate
open reduction with interdental fixation	Major
KNEE CAP : open reduction	Minor
RADIUS, shaft, closed manipulative reduction age 12 and over	Minor
closed/open. Open r4eduction, with skeletal fixation, age 12 and over	intermediate
RIBS, simple, 1 rib	Minor
SCAPULA ; closed manipulative reduction	Minor
closed/open; juxta-articular, open reduction, with/without skeletal fixation	intermediate
SPINE : vertebral process, one/more, manipulative reduction with anaesthesia	
cervical, open reduction and fusion, posterior approach, with local	Major
anterior approach with iliac or other bone graft	Major
TIBIA : shaft, closed, manipulative reduction, age 12 and over	intermediate
closed/open, open reduction, with skeletal fixation	intermediate
TIBIA and FIBULA : shaft closed, manipulative, with/without external pinning	intermediate
closed/open, open reduction, with/without skeletal fixation, age 12 and over	intermediate
ULNA, shaft, closed, manipulative reduction, age 12 and over	Minor
closed/open, open reduction with skeletal fixation, age 12 and over	intermediate
ULNA and RADIUS: shaft, closed, manipulative reduction age 12 and over	intermediate
closed/open, open reduction, with skeletal fixation, age 12 and over	intermediate
WRIST: Colles or Smith type: closed manipulative reduction: age 12 and over	Minor
closed, complex, with external skeletal fixation/percutaneous pinning	intermediate
Removal of implant; deep (eg. buried wire, pin, screw, metal band, nail, rod/plate)	Minor

10. GENITAL SYSTEM	Surgical Category
MALE	
PENIS, biopsy, cutaneous	Minor
deep	Minor
excision penile plaque	intermediate
amputation, partial	intermediate
radical	Major
circumcision	Minor
TESTIS; biopsy, needle	Minor
incision, bilateral	Minor
excision, local lesion	Minor
orchiectomy, simple, unilateral	Minor
radical	intermediate
epididymectomy	intermediate
Exploration for undescended testis	intermediate
with abdominal exploration	Major
Excision of spermatocele	intermediate
Excision of hydrocele; unilateral/bilateral	intermediate
PROSTATE; biopsy, needle or punch	Minor
incisional	intermediate
prostatectomy, external drainage of abscess, complicated	intermediate
prostatectomy, sub-total or total, including TUR	Major
radical	Major

FEMALE	
PERINEUM abscess, incision and drainage, or biopsy	Minor
VULVA and INTROITUS Bartholin's cyst, incision and drainage	Minor
marsupialization	Minor
Vulvectomy, complete, bilateral	intermediate
Radical, excluding skin graft	Major
Excision Bartholin's tumor or cyst	Minor
VAGINA, Colpotomy with exploration	Minor
biopsy, vaginal mucosa	Minor
Colpectomy, complete obliteration	intermediate
Anterior colporrhaphy, repair cystocele with/without repair urethrocele	intermediate
Posterior colporrhaphy, repair of rectocele	Minor
Combined anterior/posterior colporrhaphy	intermediate
Repair of enterocele, abdominal approach	intermediate
CERVIX UTERI biopsy or local excision of lesion, or cauterization	Minor
trachelectomy, cervicectomy, amputation of cervix	Minor
Removal of polyp	Minor
CORPUS UTERI endometrial biopsy suction	Minor
dilation and curettage (non-obstertrical)	Minor
Myomectomy, single or multiple, abdominal approach	Major
Hysterectomy total abdominal approach	Major
OVIDUCT transection fallopian tube unilateral/bilateral independent	intermediate
Salpingo-oophorectomy complete partial, unilateral/bilateral	intermediate
OVARY drainage of cyst(s) vaginal approach, unilateral/bilateral	Minor
abdominal approach	intermediate
drainage of ovarium abscess vaginal approach	Minor
oophorectomy with total omentectomy (Cystectomy)	intermediate

11. HEMIC AND LYMPHATIC SYSTEMS	Surgical Category
SPLEEN splenectomy	Major

12. HEART AND CIRCULATORY SYSTEMS	Surgical Category
PERICARDIUM Pericardiotomy for removal clot or foreign body	intermediate
partial resection for chronic constructive pericarditis, with bypass	Major
HEART intracardiac tumor, resection with bypass	Major
pacemaker insertion with epicardial electrode	intermediate
repair, cardiac wound, with bypass	Major
cardiotomy and removal foreign body with bypass	Major
Insertion/replacement of implantable cardioverter-defibrillator	intermediate
AORTA and GREAT VESSELS suture repair with bypass	Major
Myocardial Resection	Major
Repair post infarction ventricular spetal defect	Major
Ascending arch graft, with valve replacement	Complex
VALVES Aortic, commissu rotomy with bypass	Major
valvuloplasty, with bypass	Major
Mitral, commissurotomy open ,with bypass	Major
valvuloplasty, with bypass	Major
Tricuspid commissurotomy open with bypass	Major
valvuloplasty or valvectomy with bypass	Major
Pulmonary, commissurotomy with bypass	Major
Replacement single valve	Major
double valve with commissurotomy valvuloplasty one valve	Complex
triple valve	Complex
CORONARY ARTERY anomalous ligation	Major
with bypass	Major
PTCA with/without stent	Major
CORONARY ARTERY BYPASS ; autogenous on two coronary arteries	Complex
on three or more coronary arteries	Complex

Angiography & coronary catheterization	intermediate
PULMONARY ARTERY embolectomy with bypass	Major
ARTERIES and VEINS Arterial embolectomy, carotid	intermediate
renal	Major
femoral popliteal, unilateral	intermediate
Venous thrombectomy, iliac-femoral, unilateral	intermediate
bilateral	intermediate
Varicose, ligation/division/stripping, long saphenous, complete, complete unilateral	intermediate
bilateral	intermediate
short or lesser saphenous unilateral	Minor
bilateral	intermediate
long and short saphenous, unilateral	intermediate
bilateral	intermediate
ligation and excision-minor veins	Minor
Venesection	Minor
Enderectomy & arterial patch	Major
Ligation, exploration, dissection, decompression elective repair for artery/vein/arteriovenous fistula	Major
Arterial/venous catheterisation	Minor

13. MATERNITY	Surgical Category
Hysterotomy, abdominal for removal hydatidiform mole	intermediate
Hydatidiform Mole evacuation by dilation and curettage	intermediate
Ectopic pregnancy, tubal, abdominal/vaginal approach	intermediate
Ovarium pregnancy	intermediate
Interstitial, hysterectomy for uterine pregnancy, total/sub-total	intermediate
Dilation & Curettage, postpartum hemorrhage, same admission as delivery	Minor
Vaginal Delivery; with/without forceps	intermediate
Caesarian section, low cervical or classic	intermediate
Abortion, completed by dilation and curettage	intermediate
induced by dilation and curettage	intermediate

14. CHEST, RESPIRATORY SYSTEM	Surgical Category
LUNGS & PLEURA; thoracostomy, tube with waterseal	Minor
with rib resection for empyema	intermediate
thoracotomy; limited, with biopsy lung/pleura	intermediate
major, with exploration and biopsy	intermediate
with excision-plication bullae, with/without pleural procedure	Major
with removal intrapleural/intrapulmonary foreign/fibrin body	intermediate
pneumostomy with open drainage abscess/cyst	intermediate
decortication, pulmonary	Major
pleurectomy, parietal	Major
pneumonectomy, total	Major
lobectomy, total or segmental	Major
with bronchoplasty or decortication	Major
Wedge resection/enucleation of lesion, single or multiple	Major
resection, pulmonary, with thoracoplasty or resection/reconstruction, chest wall	Major
enucleation of empyema cavity, extra pleural	Major
with lobectomy	Major
thoracoplasty extrapleural resection ribs, first stage	intermediate
second stage	intermediate
third stage	Minor
pneumothorax	Minor
Sternotomy/ Thoracotomy	Major
TRACHEA and BRONCHI: tracheostomy	Minor
bronchoscopy, diagnostic	Minor
with biopsy	Minor

15. SKIN, INTEGUMENTARY, BREAST	Surgical Category
---------------------------------	-------------------

Wound management, wound of soft tissue, debridement of	Minor
ABSCCESS ; carbuncle or furuncle, incision and drainage/puncture aspiration	Minor
complicated, hematoma	Minor
ACNE: marsupialization or removal multiple milia, comedones, cyst, pustules	Minor
BENIGN LESIONS; skin tags excision, including anaesthesia, up to 15	Minor
each additional 10	Minor
other, up to 0,5 cm diameter	Minor
1 cm to 2 cm	Minor
paring or curettement, with/without cauterization	Minor
each additional , up to 0,5 cm	Minor
MALIGNANT LESIONS:up to 0,5 cm	Minor
0,5 cm to 1 cm	Minor
1 cm to 2 cm	Minor
Biopsy, skin or subcutaneous tissue, including closure, first	Minor
Incision & drainage of hematoma, seroma/fluid collection	Minor
Excision of skin & subcutan tissue	Minor
Destruct. by any method incl. laser, all benign/premalignant lesions	Minor
Removal of foreign body in subcutan	Minor
Destruct. by any method of flat warts, molluscum contagiosum	Minor
Dermabrasion	Minor
Excision, excessive skin & subcutan tissue (incl. lipectomy); abdomen (abdominoplasty)	intermediate
CYST; infected or non-infected, incision and drainage, first lesion	Minor
second lesion	Minor
each additional	Minor
excision with removal sac and treatment of cavity	Minor
PILONIDAL SINUS or CYST: incision and drainage	Minor
excision, sample	Minor
GANGLION: excision	Minor
LYMPH NODE: biopsy or excision, superficial	Minor
deep	intermediate
NAILS: avulsion, nail plate, partial or complete, first second	Minor
each additional	Minor
excision, nail and matrix, partial or complete	Minor
REPAIRS, simple, sum of length of repairs; up to 2,5 cm	Minor
2,50 cm to 7,50 cm	Minor
7,50 cm to 12,50 cm	Minor
12,50 cm to 20 cm	Minor
20 cm to 30 cm	Minor
intermediate	
up to 2,5 cm	Minor
2,5 cm to 7,5 cm	Minor
7,5 cm to 12,5 cm	Minor
12,50 cm to 20 cm	Minor
complex	
1 cm to 2,5 cm	Minor
2,5 cm to 7,5 cm	Minor
TISSUE TRANSFER or RE-ARRANGEMENT	
Trunk, up to 10, sq cm	Minor
10 sq, cm to 30 sq cm	intermediate
Scalp Arms, Legs up to 10 sq cm	intermediate
10 sq, cm to 30 sq, cm	intermediate
Forehead, cheeks, chin, mouth, neck, axillae,genitalia, hands or feet-up to 10 sq, cm	intermediate
10 sq, cm to 30 sq, cm	intermediate
Eyelids, nose, ears, or lips up to 10 sq, cm	intermediate
FREE SKIN GRAFTS,pinch, single or multiple	Minor
Split skin, Trunk, scalp, arms, legs, hand, feet up to 100 sq, cm	Minor
each additional 100 sq, cm	Minor
Face, mouth, neck, ears, eyelids, orbit, genitalia up to 100 sq, cm	

Full thickness; free, including closure donorsite; Trunk up to 20 sq cm	Minor
each additional 20 sq, cm	Minor
Scalp, arms, legs up to 20 sq cm	intermediate
each additional 20 sq, cm	Minor
Forehead, cheeks, chin, mouth, genitalia, neck, axillae, hands, feet up to 20 sq cm	intermediate
each additional 20 sq, cm	Minor
Eyelids, nose, ears and lips up to 20 sq, cm	intermediate
each additional 20 sq, cm	Minor
PEDICLE FLAPS; skin and deep tissue	
tube pedicle without transfer or major `delay` a large flap	intermediate
primary attachment, open/tubed flap to recipient site	intermediate
Intermediate `delay` any flap, primry `delay` small flap or sectioning of pedicle or tubed	
or direct trunk flap; Trunk	intermediate
Scalp; arms, legs	intermediate
Forehead, cheek, chin, mouth, neck axillae, genitalia, eyelids, nose, hands or feet	Major
BREAST : puncture aspiration of cyst, single	Minor
Mastotomy with exploration/drainage of deep abscess	Minor
biopsy, needle	Minor
incisional	Minor
excision, cyst/fibro-adenomal/benign tumor/aberrant tissue/ duct lesion/nipple lession, male or female, 1 or more, unilateral	intermediate
mastectomy, complete, unilateral	Major
bilateral	Major
partial, unilateral	Major
subcutaneous unilateral	intermediate
radical, incl. breast, pectorl muscles, axillary and lymph nodes	Major

16. URINARY SYSTEM	Surgical Category
KIDNEY : exploration	intermediate
drainage perirenal or renal abscess	Intermediate
Nephrostomy, nephrotomy with drainage	Major
Nephrolithotomy (removal of calculus)	Major
large staghorn claculus	Major
biopsy, percutaneous	Minor
by surgical exposure	intermediate
Nephrolithotripsy (ESWL)	intermediate
Nephrectomy, including partical ureterectomy	Major
radical, with regional lymphadenectomy	Major
Cysts, excision of	Major
aspiration or injection of, percutaneous	Minor
Nephropexy, fixation or suspension of kidney	intermediate
URETER: ureterotomy, with exploration or drainage	Major
ureterlithotomy, upper one third of ureter	Major
Dilation of urethral stricture	Minor
BLADDER: aspiration by needle	Minor
by trochar or inter catheter	Minor
by insertion suprapubic catheter	Minor
Cystotomy or cystostomy with fulguration	intermediate
Cystotomy with insertion ureteral catheter	intermediate
Cystolithotomy	Major
Cystourethroscopy, with biopsy	Minor
Excision, cystectomy, complete	Major
with bilateral pelvic lymphadenectomy, including external iliac hypogastric and abturator nodes	Complex
with ureteroileal conduit or sigmoid bladder including bowel anastomosis	Complex
Litholapaxy; crushing/fragmentation of calculus in bladder & removal of fragments (over 2.6 cm)	Major
URETHRA: dilation of urethral stricture	Minor
